

Mobiky Folding Bike Review

Monday, 29 October 2007

Last Updated Saturday, 05 September 2009

The Mobiky Genius Folding bike is a very clever little bike with it's quirky design incorporating some very clever features. This bike can be folded into a very compact size (just 61 x 34 x 81 cm's) making it ideal for city use, being very easy to manage on public transport, and easily storable.

Folding takes approx 3 seconds and in its folded state the ease of handling is aided by a carry handle integrated into the design.

An aluminium frame makes for an impressively lightweight bike (13.5kg). A 3 speed hub gear operated by a twist grip shifter keeps you rolling along comfortably, while a mini disk brake brings you to a reliable stop again. Adjustable saddle and handle bar height makes this bike well suited to children over 8 and smaller adults, with the same adjustability allowing a rider's up to about 5'11 being able to ride the bike comfortably. Maximum recommended rider weight is listed as 245 lbs. Several colour options are available.
